

IN THE SUPREME COURT OF BANGLADESH
HIGH COURT DIVISION
(Special Original Jurisdiction)

WRIT PETITION NO. 8098 of 2013

IN THE MATTER OF:

An application under Article 102(2)(a)(i) of the Constitution of the People's Republic of Bangladesh.

AND

IN THE MATTER OF:

Ain-O-Salish Kendro (ASK) and others

í .í í í Petitioners

-Versus-

Bangladesh, represented by the Secretary, Ministry of Housing and Public Works, Government of the People's Republic of Bangladesh, Bangladesh Secretariat, P.S. Shahbagh, Dhaka and others.

WRIT PETITION NO. 1166 of 2012

IN THE MATTER OF:

An application under Article 102 read with Article 44 of the Constitution of the People's Republic of Bangladesh.

AND

IN THE MATTER OF:

Mohammad Kamrul Ahsan (Sumon) and others

Vs.

Government of Bangladesh, represented by the Secretary, Ministry of Environment and Forests, Bangladesh Secretariat, Dhaka and others.

í í í í Respondents

Mr. Fida M. Kamal with
Mr. A.M. Aminuddin and
Mr. Iqbal Kabir, Advocate

í ..For the petitioners.

descent environment. They challenged the legality of the layout plan of *Purbachal New Town Project* taken up by Respondent No.4 specially so far as the plan relates to two *mauza*, namely, Barakau and Parbartha, with a prayer for direction to protect and conserve the forest (*Shaalbon*), water bodies, wet and agricultural lands that characterize the *mauza* in line with the findings contained in the report (Annex-D) submitted by Respondent No.5 (Department of Environment) and the findings of Existing Landuse Map of Gazipur Part (Annex-G). As an interim relief they asked for a direction to form a committee with independent experts to prepare and submit a report as to the present status of the two *mauza* and ecological and social consequences thereof if the plan is implemented. They also prayed for an order of injunction. Rule was issued but none of the interim prayers, however, was granted.

Since the two writ petitions are premised upon shared concern for protection of forest, biodiversity and environmental balance involving common questions of law and facts we propose to dispose of both by this single judgment.

The case of the petitioners in Writ Petition No. 8098 of 2013, in short, is that Respondent No.4 ie, *Rajdhani Unnayon Katripakhya* (õRAJUKõ for short) took up a housing project in 1995 called *Purbalchal New Town Project* (hereinafter referred to as õthe projectõ) comprising an area of 6140 acre land located between Sitalakhya and Balu rivers covering two police stations; one of Narayanganj and another of Gazipur district. The project is set to be completed by 2015. The project area includes 1600 acre land appertaining to Barakau and Parabartha *mauza* under Gazipur district comprising five villages and above 42% dense forest largely of *gajarigarh* type. If the project is allowed to be implemented as *per* its layout plan there would be a transformation of vast wetlands and dense forest into urban landscape to the detriment of the rich ecosystem of the area adversely affecting biodiversity and environmental balance. It is important in the interest of sustainable development to conserve the forest, vegetative cover, medicinal plants and wetlands that characterize the most part of the two

mauza instead of destroying them in the interest of an avoidable extension of a housing project. Further case of the petitioners is that RAJUK in pursuing the project has ignored the requirement of law and chose not to take Environmental Clearance Certificate from the Department of Environment (DoE for short) nor did it go for an environmental impact assessment (EIA) which is a prerequisite of a development project of the kind.

There are ten respondents in this writ petition, namely, Bangladesh, represented by the Secretary, Ministry of Housing & Public Works; Secretary, Ministry of Land; Secretary Ministry of Environment & Forest; Rajdhani Unnayan Katripapakkha (RAJUK); Director General, Department of Environment; Deputy Commissioner, Gazipur; Upazila Nirbahi Officer, Kaliganj, Gazipur; Project Director, Purbachal New Town Project; one Ataur Rahman, House No. 307, Road No.21, New DOHS, Mohakhali and one Nurujjaman Khan, village Purbagram, Thana Rupganj, District Narayanganj.

Respondent No. 4 (RAJUK) contested the Rule by filing affidavits-in-opposition. The case of RAJUK, in brief, is that land of the concerned two Mauza, namely, Barakau and Parabartha comprising an area of 1600 acres was acquisitioned in 2002 to form part of Purbachal New Town Project which was taken up in 1994. Compensation money was duly paid to the affected persons. After completion of acquisition process the land was handed over to RAJUK. In order to proceed with the project works RAJUK has obtained location certificate from the Department of Environment (shortly DoE) in 2002 and also a no-objection certificate from the local Union Parishad Chairman. As per requirement of location clearance certificate RAJUK prepared an environment study report in March, 2007. The layout plan of the total project area comprising 6150 acre land including two questioned Mauza is prepared by DatEx, a professional consultancy firm, keeping the core forest unaffected and provisions for adequate spaces for greenery, eco-park, golf-course, park, urban green, Lake etc. so as to make the project environment friendly. Total 215+36 acres lands of the

two *mauza* are reserved as forest and greenery not to be allotted to any applicant. The project was also approved in the ECNEC meeting. RAJUK has undertaken massive development works in the lands of the said two *mauza* so that the project may be completed within the deadline. Sixty percent of the works has already been completed. Five hundred plots are earmarked for the affected persons and already allotted to them. The objective of the new township, amongst others, is to make a human habitat in an environment- friendly and sustainable atmosphere. With that end in view an environmental impact assessment (shortly *øEIAö*) is made through a professional consultancy firm. The allegations made are not correct and that the matter is already settled up to the Appellate Division in Civil Appeal Nos. 83-84 of 2006. The petitioners of Writ Petition No. 1166 of 2012 in particular have come up with their petition under the banner of environmental protection virtually for the same relief they failed to attain in the earlier writ petition.

Mr. Fida M. Kamal, Leaned Counsel appearing for the petitioners, submits that the writ petition is not intended to undo or to foil the project. The petitioners had to approach the court in their anxiety to exclude the two *mauza* of Gazipur part of Purbachal housing project, namely, Barakau and Parabartha precisely for the reason that a considerable part of the two *mauza* is covered by dense shaal forest locally known as *Gazaigarh*, orchard, medicinal plants and water bodies. This rare topographical feature of the area, apart from its ecosystem services, is directly contributing to environmental balance. We can hardly afford to sacrifice this invaluable natural vintage for narrower interest of a housing project which can fairly be accommodated in any other suitable place. According to him there cannot be a sustainable development with its ecological and environmental aspects ignored or underplayed. Already much damage is done to the environment and ecological support system in the name of development. Much of our green, wetland, water bodies; orchard, forest and agricultural lands were lost to urbanization, industrializations and other development schemes without caring much about its impact on environment and consequences

on human health and safety. We must stop somewhere for our own interest.

Back on records, Mr. Fida Kamal submits that the landuse map called 'Existing Landuse Map of Gazipur Part II contained in Annex-G to the writ petition, prepared by Data Expert Ltd. shows, *inter alia*, that 486.77 acre of the two mauza is covered by mixed forest, 190.73 acre is covered by forest and 629.70 acres are cultivable land. But the map (Annex-14) under the same title produced by RAJUK took a sharp departure from the earlier map and demonstrated 486.77 acre land as 'Homestead Vegetation' instead of 'Mixed Forest'. There is nothing like Homestead Vegetation in the original landuse map jointly prepared by Data Expert, RAJUK and the local community. Only 190.73 acre land is shown as forest while a vast area of mixed forest has been surreptitiously labeled as homestead vegetation and the impugned layout plan is prepared with the distorted landuse statistics. Mr. Kamal laid an unsparing attack on RAJUK saying that RAJUK, in preparing the layout plan so far as it relates to the aforesaid two *mauza*, has ignored its responsibility to protect the environment and ecology, defied legal mandate for making environmental impact assessment and in taking environmental clearance certificate. RAJUK, he said, defeated its own project objectives to make environment friendly sustainable development. RAJUK, he insisted, is now producing a postdated EIA report professedly accepted by the Department of Environment only to mislead the court and misdirect the course of justice. The EIA of RAJUK produced of late is faulty in that it has not been prepared in line with any given ToR from the Department of Environment. Mr. Fida Kamal pointedly brought forth the question of 'sustainable development' and emphasized that there is no alternative of testing a development project against its possible impact on environment which is now a global order universally accepted as a tool to save our mother planet from the desatrous effect of climate change.

Mr. Mahbub e Alam, learned Attorney General submits on the other hand that the case of the petitioners suffers from the vices of

overstatements and uninformed activism. The land under Barakau and Parabartha *mauza* was acquired back in 2002. Compensation money has been paid to the affected persons. Two groups of local inhabitants successively came up with similar issues and fought the Government and RAJUK in two writ petitions filed in 2002 and 2006 and lost. The writ petitioners of 2002 went up to the Appellate Division with the matter and bowed away with the same fate. This time they have come through the environmentalists with the god-like justification for saving the forest and environment. The forest, he stressed, is not a natural or reserved forest. It is commercial forest owned by private individuals. More so, the core forest, water bodies and canals are maintained not destroyed. In addition provisions are kept in the layout plan for urban green, play-lot, eco-park and other open spaces required for maintenance of good environment in a modern housing project. The avowed objective of the project is to build an environment-friendly urban habitat in a sustainable atmosphere. Mr. Mahbub e Alam stressed that RAJUK is fully conscious about its legal responsibility and proceeded with the project as per the dictates of law. In order to proceed with the project RAJUK has obtained location clearance certificate from the DoE in 2002, a contemporaneous no-objection certificate from the local UP chairman. As per requirement of location clearance certificate RAJUK got an environmental study carried out back in 2007 as well as an environmental impact assessment subsequently made through a specialized consultancy firms. In Addition, he said, adequate mitigation measures are taken in order to replenish the unavoidable loss through modern environment management mechanism.

Mr. Attorney General further submits that *Purbachal* is the biggest ever planned township in the country as well as is a long felt and well-planned project intended to accommodate thousands of low and mid-income families who have hardly or no means to afford an accommodation in the private sector housing market. Five hundred of the plots are earmarked as 'rehabilitation plots' and allotted to the affected persons. RAJUK as a public authority cannot afford to be unconcerned

about environment, ecosystem and biodiversity. Seminars and workshops were organized on Detailed Area Plan (DAP) in late 2008 so as to facilitate evaluation and upgradation of all the ongoing projects as *per* recommendations made by experts. The recommendations that thrashed out of discussion led to formation of 12-member review committees in January, 1, 2009 by the Ministry of Housing & Public Works comprising of eminent citizens and NGO representatives of which Petitioner No. 3 (BELA) was a member. Subsequently in March, 7, 2010 another committee comprising of eminent citizens and NGOs again including BELA, was formed by the same ministry further to examine *inter alia*, whether recommendations were reflected in the Dhaka Metropolitan Development Plan (DMDP) Structure, urban area plan, Detailed Area Plan (DAP) landuse proposals and standard of the proposed projects including their regal limitations. The committee sat on different dates and after project-wise evaluation made their recommendations. No indication was made by the committees that vast tract of forested land being cleared away or Pubachal was going to be environmentally unsustainable or that serious environmental degradation will ensue if the project is implemented. Learned Attorney General pointed out the existing landuse statistics suggest that total forested area including scattered forest pockets is 191.50 acres. The pockets being spread over far flung areas could not be retained from feasibility point of view but the core forest area of 147.73 acres is reserved and shown in the layout plan. The percentage of open space, he insisted, kept in terms of forest, green-belt, lake, park, urban green etc. is exactly in keeping with the South- Asian standard. More so, land acquisitions of two *mauza* were found to be valid by concurrent findings of the superior courts and affirmed by the apex court despite the fact that the issue of deforestation and environment raised which necessarily means that there was no case of deforestation worth cognizance. He dismissed the allegation that RAJUK ignored its legal obligations to take environmental clearance certificate by submitting environmental impact assessment in the Department of Environment.

This action was brought *pro bono*, ie, as *PIL*, by a group of environmentalists with their natural concern for protection of forest, wet and agricultural lands to be lost to a township project taken by RAJUK. Although *PIL* is an emerging jurisprudence has already attracted a huge literature settling a number of basic principles and guidelines to be followed in fighting as well as deciding litigations of the kind. **For** our purpose it will suffice to say that petitioners in a *pro bono* action, as distinguished from ordinary litigants, do have no personal interest in the cause they fight for. They fight for public causes seeking remedy against public injury or public wrong, threatened or real, committed primarily by the state agencies affecting people in general or any determinate or indeterminate group or class of persons. It is in the sense a *PIL* is not adversarial as an ordinary litigation and is always focused on the cause regardless of the flaws, if any, of the opponent's case unless they are absolutely necessary for vindicating the cause itself.

With this in mind let us see how a case of destruction of forest as well as greenery affecting environment and ecosystem could be made out by the petitioners. Here in this case the petitioners allege a threatened public injury posed by a public body by way of acquisition and impending transformation of a vast tract of forested land, orchards, water bodies etc. into an urban habitat to the utter detriment environmental balance affecting health and safety of millions of people. They rightly claim that an ecologically critical area is irreplaceable but a housing project is not. Therefore, sacrificing forest and greenery at the altar of urbanization stands to no sense at all. It is their specific case that the housing project taken is a mockery to its own objective of sustainable development.

Two documents stand out to be the sheet-anchor of the petitioners' case, namely, a 2-page Report (Annex-D) dated 24.2.2010 submitted by the Respondent No. 5, ie, the Department of Environment and the 'Existing Landuse Map of Gazipur Partö (Annex-G). The Report emanated from a single spot- visit by two officials of DoE made on 15.2.2010. The report essentially contains three findings: **a)** most of

the lands of the two mauza (1300 acre) are raised and is mostly covered by dense *shal* forest locally known as *gazarigarh*. In addition there are orchards and valuable medicinal plants. The area is topographically rich and environmentally critical b) High Court Division directed RAJUK in Writ Petition No. 1460 of 2006 to take appropriate steps to protect environment of the area and the government to declare the area as ecologically critical if found expedient so to do and c) the legal requirement of obtaining environment clearance certificate by submitting EIA report is not yet fulfilled.

The second document is the existing landuse map of Gazipur part purportedly prepared by *DatEx*, which demonstrates, amongst others, 190.73 acres as forest and 486.77 acres as mixed forest

By the above two documents the petitioners tried to show that at least 190.73 + 486.77 acre land is covered by core forest and mixed-forest respectively but RAJUK surreptitiously passed off the mixed forest area as Homestead Vegetation meaning thereby that the major part of the forest is going to be destroyed substantially affecting ecosystem and environment.

The petitioners sought to buttress up the case of neglect of RAJUK to the environmental component of the project by reference to a number of irregularities. **First**, RAJUK did not procure environmental clearance certificate and failed to report to the DoE about Environment Impact Assessment (EIA) within the specified time, therefore, the conditional location clearance certification taken from the DoE stood cancelled. **Second**, the location clearance certificate itself was never renewed. **Third**, the document filed as Annex-5 is mere environmental study prepared without any specific terms of reference which is not a substitute of EIA. More so, taking up a project of the present kind without EIA is violative of Bangladesh Environment Conservation Act, 1995. **Fourth**, the land use plans prepared by *DatEx* in furtherance of the Prime Minister's directives has not been incorporated in developing the layout plan of the project. Rather RAJUK kept the landuse plan concealed and arbitrarily prepared the impugned layout plan substantially deviating

from the existing landuse map as shown under Annex-G. **Fifth**, the review committee formed by the ministry was entrusted to review the detailed area plan of Dhaka city not of *Purbachal* project. The committee gave its opinion merely within the terms of reference not beyond. Furthermore, the impugned layout plan was approved in 2012 and the DAP-review-committee submitted its report in 2010.

By two other affidavits-in-reply dated 27th February, sworn on behalf of the petitioners attempt was made to assail the EIA report submitted by RAJUK as made *post facto* and no report in the eye of law in that law requires environmental clearance certificate and EIA must precede any change in the landuse plan. The petitioner by its supplementary reply highlighted how RAJUK went unbothered about the requests of the DoE to submit EIA report and ignored the existing landuse map (Annex-G) in preparing the impugned layout plan only to multiply plot numbers. The existing landuse map was not considered by RAJUK in preparing the final layout plan of the project. The map that is now being produced as existing land use map (Annex-14) is indeed a different version. The petitioner tried to say that the EIA of RAJUK is faulty as it has not been prepared in line with any given terms of reference of the DoE. In the EIA the earlier findings of the consultants as to 486.77 acre of mixed forest is departed from and shown as homestead vegetation. The *post facto* EIA has not thus far been accepted by the DoE nor has been placed for public scrutiny which is a requirement of law.

RAJUK on the other hand responded to the allegations of destruction of forest, greenery and ecosystem, for that matter, allegation of environmental degradation placing on records massive statistics, survey and assessment reports indicating that forest in its true sense stands over not more than 190.73 acres land of the two mauza out of which 43 acres are scattered forest-pockets situated at twenty different locations. They admit that the far-flung forest pockets could not be maintained from feasibility point of view. But the rest 144.73 acre core forest is reserved intact. RAJUK asserts that though there is a little loss in terms of

unavoidable removal of forest pockets covering only 43 acre land provisions are kept to bring the township under intensive afforestation developing a green belt all around which will far exceed the lost area. In order to beef up its case RAJUK put in three supplementary affidavits placing on records a number of documents.

With a supplementary affidavit-in-opposition sworn on 20.2.1014 RAJUK supplied a sheet of pre-project landuse categories called 'Existing Landuse Statistics' (Annex-12) whereby they tried to show that the lands (1617.69 acres) of two Mauza in question were being used in thirteen categories, in pre-project days namely, cultivable land, homestead vegetation, agricultural land, forest, homestead area, *bazar*, water bodies, *khal*, road (kacha), road (semi-pacca), road (pucca), playground and graveyard. Amongst them (as shown in the statistic-sheet) homestead vegetation (bamboo groves, fire & fruit trees, herbs & shrubs, weeds & reeds, winter vegetables etc.) covered 486.80 acres; agricultural low land covered 97.70 acres; forest (Privately-owned commercial forest of *Gozai* trees and *Shalbon*) covered 190.74 acres; water bodies (ditches, ponds & swamps) covered 41.90 acres and *khal* (canal) covered 0.02 acres. There are three sheets of paper (Annex-13) that contain a tabular presentation of landuse details. It appears from the supplementary affidavit that already there was an Environment Impact Assessment carried out in connection with the project and a report prepared in January, 2014.

RAJUK by its second supplementary affidavit dated 24.2.2014 tried to make clear its compulsion for clearing the forest pockets and at the same time brought on records a map called 'Existing Landuse Map of Gazipur Part' (Annex-14) with an statistics demonstrating 629.70 acres as cultivable land, 486.77 acre as homestead vegetation and 190.73 acre as core forest. The existing landuse map (Annex-14) relied upon by RAJUK seems to be the epicenter of the basic controversies running through the case.

By the third and final affidavit of RAJUK sworn on the 9th day of March, 2014 the question of EIA was specifically addressed saying that

environmental impact assessment has already been made and EIA Report is prepared in January, 2014. A set of new documents were also supplied with the affidavit, namely, **a)** a landuse plan of Purbachal New Town Project called "Detailed Land Use Plan on RS-Mouza" (Annex-16) prepared on 03.3.2014 by Data Expert (Pvt) Limited pictorially showing but not numerically indicating the area of reserved forest, lake, canal, river or lands of any other category. **b)** a tabular presentation of land of Brakau and Parabartha *mauza* (prepared by Data Experts Ltd) covered by forest (Core), forest, green belt (khal-lake), Lake/canal, neighborhood play-lot, park, playground, urban green and walkway shown item-wise separately by reference to their RS mauza and their total area called "Summary Land (Plot/Dag) Schedule" (Annex-17) with a 27-page breakdown by reference to mauza and Dag numbers **c)** a schedule of core forest (Annex-18) showing segment-wise, the area of land of the two *Mauza* reserved as core forest including a 3-page "information-sheet" showing core forest by reference to their respective JL, sheet & RS Dag numbers, sector, plot ID number and area and **d)** a concise project-map (Annex-19) highlighting the core forest area divided into six segments with a built-in table.

If we sort out the documents in terms of their relation to forest expanse in the two disputed *mauza* as well as the entire project area RAJUK placed on records at least seven documents, namely, **1)** "Comparative Statistics among the 2nd, 3rd & 4th Modifications Landuse Map regarding Environmental Planning Issues in the Purbachal New Town" (Annex-8), **2)** A 3-page "Existing Landuse Statistics" (Annex-12), **3)** Landuse In Details (Annex-13), **4)** "Existing Landuse Map of Gazipur Part" (Annex-14), **5)** "Summary Land (Plot/Dag) Schedule Covered by Forest, Urban Green, Park, Green Belt, (Lake/Khal) Play Ground, Neighborhood Play-Lot, Walkway & Lake/ Canal under PS-Mouza Barakau (079) & Parabartha (078) including twenty seven pages breakdown *per* RS Mauza, Plot/Dag number and area (Annex- 17), **6)** "Purbachal New Town Project: Schedule of Forest (Core)" (Annex-18)

along with a 3-page information sheet and 7) Purbachal New Town Project: Reserved Forest (Core) Segment-wise Map (Annex- 19).

In the whole array of documents, arguments and counter-arguments one thing must not escape sight that this is a *pro bono* action brought by a group of environmentalists seeking remedy against an allegedly threatened environmental degradation through deforestation and destruction of ecosystem affecting life and biodiversity. Man as natural being sustain and grow depending on the natural environment around him. There can, therefore, be no doubt that deforestation and destruction of ecosystem tend to bring an impact to bear upon human life and lives of other living creatures. It is also equally true that human struggle for survival and better life is deeply embedded in human nature which gave rise to the concept of development in the modern day sense. But development, in absolute sense, is again impossible without causing some damage to nature. This nature-development paradox practically furnished the background of the contemporary theory of sustainable development which seeks to integrate nature with development.

The phrase "sustainable development" rose to significance after it was used in the Brundtland Commission Report of 1987 titled: *Our Common Future*. The United Nations decided to establish Brundtland Commission pursuant a realization in the UN General Assembly that there was a heavy deterioration of the human environment and natural resources and the countries must be rallied to work and pursue sustainable development together. The report coined what has been the oft-quoted definition of sustainable development: "development that meets the need of the present without compromising the ability of future generation to meet their own needs." (Quoted from Wikipedia, the free encyclopedia). The report laid the foundation for convening 1992 Earth Summit, the agenda 21, the Rio Declaration and to establishment of Commission on sustainable development under the auspices of the United Nations.

Sustainable development is yet not a comprehensive theory or an all-weather remedy. It is an evolving concept subject to continual debate

among experts. Except for its underlying concern for retarding environmental degradations there is no flat application of the theory to all conditions of human development in every corner of the globe. With the variations in development level in different countries priorities on the development agenda *vis-à-vis* its environmental components is bound to differ. In a developing country like Bangladesh where there is no significant industrialization, urbanization or other massive development projects up to affecting global climate and where governments are still striving to provide millions of low and mid-income families with shelter and accommodations in a more or less healthy environment, asserting as much exactitude and precision in development projects, in terms of their environmental integration as is possible in developed countries is impracticable.

We do appreciate the relentless efforts of the environmentalists given to a great public cause and more often allow standing so as to facilitate vindication of the cause. But that does not mean an ill-timed and casual move in the name of environment not founded on minimal homework, study or survey enough to satisfy judicial minds and totally unconcerned with the socio-economic reality and basic needs and priorities of a particular population can be judicially accommodated. No judicial arm can be extended unless it could be shown, that too in appropriate time and on a tangible basis, that there is reckless deforestation and destruction of ecosystem and the proposed project is going to be implemented beyond the carrying capacity of nature and ecological support system and the loss from such destruction **is irreconcilable and far exceeds the gain derived from the destruction.**

As is earlier said the petitioners tried to build up a case of much higher forest cover than is claimed by RAJUK by reference to two documents (Annex-D &G) one indicating forest covering most part of the two *mauza* and the other indicating existence of forest, including core and mixed, on $190.73+486.77= 677.50$ acres.

RAJUK flatly denied the claim and dismissed the figures presented by the petitioners and supplied its own account of the forest expanse

reflected at least in seven documents enumerated hereinabove-all of which are undisputed except the landuse map (Annex-G) to which the petitioners expressed their reservations but failed to prevail over.

The existing landuse map relied upon by the petitioners bears no seal or signature of any authority and the petitioners failed to raise the same above question. The project is the largest ever planned township of the country and has passed through many tests and scrutiny ever since its birth in 1994 and finally survived and is near completion now. It is not a case nor stage to embark upon an otherwise disputed document, more so outflanked and outweighed by series of documents to the contrary, to the detriment of progress of an important project which is near completion.

As for the Inquiry Report submitted on behalf of the DoE, we see no reason to take notice of it as the same is totally worthless and unmeaning indicating inefficiency of a government department and lack of coordination among ministries of the Government. Furthermore, the inquiry report was made on a single spot-visit by two DoE officials. The report is a product of surmise not of survey and besides being ill-founded bears an apparent overtone of interdepartmental disquiet thus is tainted with bias. The figure of the dense forest indicated there is not supported by the local chairman, objections filed against acquisition, the writ petitions filed by the affected persons challenging acquisition notices, study and survey carried out on behalf of RAJUK and even by the present petitioners. Question naturally arises if the two disputed *mauza* are mostly covered by dense forest and RAJUK was so defiant in carrying out the project without environmental clearance certificate why the DoE had been silent over so long years; why they did not take any steps at the government level in order to settle down the internal incoherence and the environmental issue.

Purbachal is a Government project and the Attorney General appeared on behalf of the Government to defend the project. The stand of any of the government-department, agency or public authority cannot be different from what is pleaded by the Government. Anyone of them

did not come up with different stand either. For us, we notice here an EIA Report of the project produced in court on behalf of RAJUK prepared by *DatEx* in January, 2014. We see no reason to doubt or discard the same as a document handed in by the Attorney General. Besides the EIA, there is an Environment Study Report of 2007 submitted by RAJUK with its application for environmental clearance certificate. As transpired from records, RAJUK organized seminars and workshops for an open discussion on the Detailed Area Plan (DAP). Following the recommendations that thrashed out from seminar/workshops two review committees were successively formed in January, 2009 and March, 2010 by the Ministry of Housing & Public Works comprising eminent citizens, NGO- representatives and individual experts in order to examine, *inter alia*, whether the recommendations found manifestations in detailed area plan of Dhaka city. It appears that Petitioner No.3 (BELA) was included as member in both the committees formed by the Ministry. An overview of the successive events mentioned above along with the ECNEC approval to the project suggests, in absence of equally credible documents to the contrary, that the claim of the petitioners about forest expanse and severity of environmental degradation is ill-founded and largely unconnected with reality on the ground.

The allegations of the petitioners touching upon alleged failure of RAJUK in getting the location clearance certificate renewed, infractions of law in taking up the project, surreptitious deviation of RAJUK from the existing landuse plan etc, call for no consideration in a *pro bono* action for the precise reason that the cause of action of the PIL ie, deforestation and environmental degradation has virtually trailed away and failed.

Over and above, the issue of deforestation and environmental degradation, as mentioned by the Attorney General, has already been canvassed in at least two writ petitions ie, Writ Petition No. 3941 of 2002 and Writ Petition No. 1460 of 2006 brought both in private and public interest. Writ Petition No. 3941 of 2002 was brought by a number

of local inhabitants challenging legality of acquisition-notices by reference, amongst others, to deforestation and environmental degradation. The petitioners came out unsuccessful before the High Court Division. Civil Appeal No. 83 and 84 of 2006 arose out of the judgment passed by the writ petition. Both the appeals were dismissed. While dismissing the appeals the Appellate Division held:

“We have perused the said DMDP plan which is part of the Mastar Plan inasmuch as the Government considering the efficiency, utility, and the attending facilities attached to the area and the requirement of the probable allottees have decided to develop the part of the DMDP structure plan and only adopted purbachal project 2 mauzas_ of Parabartha and Borokaw of Kaliganj Police Station under Gazipur District and started acquisition of land in 14 mauzas of Rupganj Police Station under Narayangianj District ...complying the provisions of the Acquisition and Requisition of Immovable Property Ordinance, 1082 and accordingly issued notice of acquisition of the land which are required in the public interest and in the public purpose....It further appears that the objections were filed against acquisitions which were duly considered by the authority and the authority having considered the objections overruled the same and proceed to acquisition of the land in question for public interest and public purpose upon hearing objections ... We do not find any mala fide or illegal motive of acquiring acquiring authority. On the contrary, the project is for greater public interest and for public purpose in order to provide the accommodation problem of allottees.”

Writ Petition No. 1460 of 2006 was brought in the form of PIL by another set of inhabitants of the Barakau and Parabartha mauza challenging acquisition- notices by reference to destruction of forest and environmental balance, this time, specifically asking for a direction not

to destroy Gazaribon, orchard and forest of Barakau and Parabartha to the detriment of environment of the locality. While discharging the Rule a Division Bench of High Court Division observed:

“ Learned Advocate for the petitioners contends that in previous writ petition , awardees being affected persons, filed the writ petition but in the instant case only the local people are coming to protect the environment keeping the forest and and river with the project area alive in its own manner... Now it has become clear to us that both petitioners and the respondents are fully aware and under commitment to protect environment keeping natural forest area known as Gazarigarh and orchard as it stands. The map of master plan Annexure-10 to the affidavit-in-opposition shows that the respondent No.4 has kept such forest area to the extent of 166.481 acre in sector 24, 25 and 12 for forest and eco-park. But depicting the entire project land area the petitioners have made out their case which stands against the reality which can only be adjudicated in proper forum but not in writ jurisdiction.”

We have gone through the petitions of both the writ petitions and the judgments, quoted above in part, passed in those two cases. In both the petitions questions of deforestation and environment were specifically raised and in one case relief against deforestation was specifically asked for. In both the cases the allegations touching upon deforestation and environmental degradation failed to weigh with the judicial mind and the courts found the acquisition to be legal and was done in public interest which goes to show that the petitioners, after so long years, rose to the sound of environmental degradation and labored on a vague and inflated notion of forest expanse virtually asking for reopening the issue already settled (or at worse found not worth cognizance) up to the Appellate Division.

The petitioners as environmentalist organizations may have natural concern for protection of environment and right of the citizens to live in good environment. We are always mindful to their concern and in appropriate cases this court did never hesitate to interfere with steps taken to the detriment of environment and ecosystem. Here in this case the petitioners have come to court when the project has already travelled nearly twenty long years having passed through many hurdles, including scrutiny by ECNEC, land acquisitions, objections, litigations involving acquisition and environmental issues fought upto the Appellate Division and scrutiny by high- profile review committees and is going to be completed within little more than a year.

The petitioners' efforts to protect forest and environment are apparently ill-timed, curiously uninformed and off-hand. Records do not bear witness that they as organizations working in environmental area have ever been awake to the development of the project at least from 2001 when the land of the two *mauza* were acquisitioned, objections were being heard, and the writ petitions by the local residents were being fought over years or took pains in doing any study or survey of their own. They rather chose to wake up to the murmur of the other writ petition (WP No. 1166 of 2012); some of them tried to step into the same as respondent and thereafter collectively brought the instant writ petition of their own in mid- 2013 to fight against destruction of forest etc. seemingly unprepared and depending on environmental jargons and rhetoric in the comfort of a court-room atmosphere. It did not seem to us that the petitioners burnt their midnight candles enough to read through and between the lines of the judgments passed by the High Court Division as well as the Appellate Division which concurrently affirmed the validity of land acquisition amid claims of environmental damage by extensive deforestations which means by necessary implication that the forest expanse pleaded failed to gain ground.

Notwithstanding the question of earlier decided cases, the petitioners have failed to press home their claim of forest expanse and its potential

destruction let alone a *prima facie* case of environmental degradation on that basis so as to justify interference by this court.

So far as the Writ Petition No. 1166 of 2012 is concerned, the same, as mentioned earlier, is also brought *pro bono publico* by three local residents asking for a rule as to why the inaction of the respondents in declaring 1300 acre land of Baraka and Parabartha *mauza* as ecologically critical area should not be declared without lawful authority and is of no legal effect.

There is nothing on records suggesting that the petitioners are public spirited persons having interest more than and concern deeper than that of a busybody for protection of environment or ones having special knowledge in environmental science or involved in environmental movements. They hail from a village under Barakau *mauza*, ie, one of the two *mauza* in question. Mere belongingness to the vicinity of a forested area does not *per se make* any person competent to ask for *standing* to bring *pro bono* action on issues demanding special knowledge, experience and expertise enough to give proper instructions to the lawyers and to assist the court to come to a right decision. Furthermore, the issue they raised, as is said earlier, has already been raised, *albeit* in different form, by score of other local residents, in two earlier writ petitions and accordingly decided by the superior courts. The present writ petition by three local residents seems to us to be a clandestine attempt at reintroducing the same issue in different form. This is clearly an ill-advised attempt taken for collateral purposes which speak against *bona fide* of the petitioners in approaching court in fighting a public cause. They are not entitled to standing to fight for a public cause of the present kind. Their action as PIL is incompetent and fails on maintainability count.

Failure of the petitioners in pressing home their own case notwithstanding, it is no denying that this is a case of great public importance involving rights of tens of thousands of prospective dwellers to live generations after generations in a healthy and descent environment. It is, therefore, a matter of overriding importance that the

area covered by forest, eco-park, lakes, canals, playgrounds, open spaces and other urban greens claimed to have been preserved and maintained in the project area by RAJUK be preserved and maintained exactly as they are reflected in their documents produced in support of their case. Keeping the concern in mind we find it expedient to keep this writ petition pending with a direction to maintain the aforesaid components of the project exactly as they are sought to be maintained by RAJUK.

Seen in the light, three documents, amongst many, produced by RAJUK in support of their case appear to be crucially important, namely, *Purbachal New Town Project Detailed Landuse Plan on RS Mauza (Annex-16)*; *Summary Land (Plot/Dag) Schedule Covered by Forest, Urban Green, Park, Green Belt (Lake/Khal), Play Ground, Neighborhood Play-Lot, Walkway & Lake/Khal under RS-Mouza Barakau (079) & Parabartha (078) (Annex-17)* and *Purbachal New Town Project: Schedule of Forest (core) (Annex-18)*. Annexures 16 is the detailed landuse plan of the entire project prepared on RS Mauza pictorially displaying locations, amongst others, of reserved forest, lake/canal, river, park, urban green, playground, playlot and green-belt spreading over and around the entire project area; Annexures 17 is an index of core forest, forest, green belt (khal/lake), lake/canal, neighbourhood playlot, park, playground, urban green and walkway falling within Barakau & Parabartha mauza made by reference to their respective RS mauza and area measured in acres including a 27- page breakdown made by reference to RS mauza, dag number and area in acres; And Annex- 18 is the schedule of core forest maintained in the aforesaid two mauza presented segmentwise with a 3-page breakdown made by reference to JL No., Sheet No., RS Dag No., Sector, Plot ID and area. The landuse plan (Annex-16) shall be treated as part of this judgment. And the other two documents, namely, Annex- 17 & 18 are incorporated hereinbelow.

ANNEX-18

Purbachal New Town Project : Schedule of Forest (core)

RAJUK Kept the forest to protect the SHAL/GOZARI trees in the Purbachal New Town Project at the Barakau & Parabartha Mouza. Total Forest Area has preserved **163.582** acres at that 2 Mouzas in the layout plan. Dedicated Forest named Forest (core) area is **144.770 acres**. Forest (core) comprises 6 segments forest which situated in the sector 24 & 25 of Purbachal New Town. Detail schedule are attached in tabular sheet herewith comprising Mouza name, JL no., Sheet no, RS Dag/plot no., Sector, Plot ID, Detail use, Area in acres, Segment no. A map showing that 6 segments is also attached herewith.

Segment wise Forest (core) schedules are given below:

Segment 1: This segment is situated in the Barakau & Parabartha mouzas. At Barakau JL no. 79, Sheet no. 2, RS DAG/plot no. 1106, 1108, 1109, 1152-1154, 1158-1161, 1321; at Parabartha JL no. 78, Sheet no. 1, RS DAG/plot no. 120-122, 294-295. At present lay out map Plot ID 25-206-056, Sector 25, Road 206, Plot 056. It is surrounded by Road no 326 (54 ft wide) at north, Road no 120 (75 ft wide) at south, Road no 206 (150 ft wide) at east, Road no 205 (75 ft wide) at west. Total Area of Segment 1 is **23.45777 acres.**

Segment 2: This segment is situated in the Barakau & Parabartha Mouzas. At Barakau JL no. 79, Sheet no. 2, RS DAG/plot no.1322; at Parabartha JL no. 78, Sheet no. 1&2, RS DAG/plot no. 122, 295-300, 308, 317-321, 325, 326, 623-633. At present lay out map Plot ID 24-123-022, Sector 24, Road 123, Plot 022. It is surrounded by Road no 315 (54 ft wide) & 123 (150 ft wide) at north, Road no 120 (75 ft wide) at south, Lake at east, Road no 326 (54 ft wide) & 206 (150 ft wide) at west. Total Area of Segment 2 is **36.61416 acres.**

Segment 3: This segment is situated in the Parabartha Mouza JL no. 78, Sheet no. 2, RS DAG/plot no. 602, 607-608, 614, 618-621, 623. At present lay out map Plot ID 24-123-024, Sector 24, Road 123, Plot 024. It is surrounded by Road no 123 (150 ft wide) at north, Road no 120(75 ft wide) at south, Road no 406 (54 ft wide) at east, Lake at west. Total Area of Segment 3 is **12.11527 acres.**

Segment 4: This segment is situated in the Parabartha Mouza JL no. 78, Sheet no. 2, RS DAG/plot no. 609, 610, 614. At present lay out map Plot ID 24-404-041, Sector 24, Road 404, Plot 041. It is surrounded by convention center (separated by Walk way) at north, Lake at south, Road no 404 (54 ft wide) at east, Lake at west. Total Area of Segment 4 is **5.306454 acres.**

Segment 5 : This segment is situated in the Parabartha Mouza JL no. 78 & 79, Sheet no.1 & 2, RS DAG/plot no.321-325, 328-338, 341-342, 632-640, 1329, 1336. At present lay out map Plot ID 24-116-001, Sector 24, Road 116, Plot 001. It is surrounded by Road no 120 (75 ft wide) at north, Road no 116 (100 ft wide) & 402 (30ft wide) at south, Lake, Nursery & play lot & road no 207 (54 ft wide) at east, Road no 401 (54 ft wide) at west. Total Area of Segment 5 is **44.75842 acres.**

Segment 6: This segment is situated in the Barakau & Parabartha Mouzas. At Barakau JL no. 79, Sheet no. 2, RS DAG/plot no. 1312, 1324, 1329, 1331-1336; at Parabartha JL no. 78, Sheet no. 1, RS DAG/plot no. 328, 333. At present lay out map Plot ID 24-206-002, Sector 24, Road 206, Plot 002. It is surrounded by Road no 313 (54 ft

wide) at north, Road no 116 (100 ft wide) at south, Road no 401 (54 ft wide) at east, Road no 206 (150 ft wide) at west. Total Area of Segment 6 is **22.51768 acres**.

Respondents are accordingly directed not to efface, subtract, vary, modify, or otherwise change the forest (core), forest, lake/canals, urban green, parks, playgrounds/playlots, green-belt as well as similar other environment-oriented spaces of the project as demonstrated in the documents contained in Annex-16, 17 & 18 and other supporting documents produced by RAJUK to the derogation of their basic purposes without permission to be taken from this court.

The, rules issued in two writ petitions are disposed of with the above direction. Since the nature of direction demands pendency of at least one of the two writ petitions we elect Writ Petition No.8098 of 2013, as one not defeated on maintainability count, for the purpose. Accordingly-

The Writ Petition No. 8098 of 2013 shall remain pending and the direction given shall sustain as continuing mandamus as long as this court will not dispose of the same by an express order.
